Dear Mr Hayes

Re: Proposed change of reporting Line – Hospital in the Home Service

St Vincent Hospital Sydney (SVHS) has identified a proposed change of reporting lines that will create an opportunity to better align services. The Hospital in the Home (HITH) Service is a service that currently reports to the Sub-Acute, Ambulatory Care and Community Stream (SACS) Services of the Operational Directorate. The proposed change of reporting line will result in reporting into the St Vincent's Virtual Health Service.

The proposed change in reporting line will better align services delivered virtually and through online platforms, enabling synergies and collaboration. The proposed change will have minimal impact to staff; with their terms of employment, pay/classification, location and governance structures remaining unchanged.

In light of the above, we have scheduled a consultation meeting with the staff of HITH to discuss the proposed changes on Tuesday 14 May 2024. An outline of the proposed changes will be delivered to the staff at the meeting. We request that confidentiality is maintained until we meet with the relevant staff. If you would like to meet prior to this meeting, please contact Chris Hadjisavas by Tuesday 21 May 2024 who can facilitate a suitable meeting time.

Should you have any questions in relation to this matter please contact Christopher Hadjisavas via christopher.hadjisavas@svha.org.au or 0481 117 174.

Yours sincerely,

Nicole De Tullio
Acting Stream Manager, Subacute, Ambulatory and Community Services
St Vincent's Hospital Sydney
