## 1. Introduction

As Chief Executive of South Eastern Sydney Local Health District (SESLHD) I am committed to delivering the *Exceptional Care, Healthier Lives* Strategic Plan 2022-25. Within this, our Statement of Intent speaks to being a global leader in innovative and sustainable health services.

In recent years we have stepped up to many challenges, including the COVID-19 pandemic, and as we move forward we will also continue to face a range of challenges, including our financial sustainability.

As the health needs of our communities evolve, the service requirements and the delivery of services also changes. It is imperative that our structures and workforce are aligned to support these changes and needs. The proposed changes presented in this document are consistent with the District's commitment to our strategy and to ensuring that our resources are directed to work that meets local communities current and emerging expectations.

This proposed change is designed to limit impact to frontline clinical service delivery and instead focus on administrative and management roles where efficiencies can be gained.

Although the proposed structure is beneficial for SESLHD's financial sustainability, there will be some positions that will no longer be required in their current format and/or location, or whose grades and/or reporting lines will change. SESLHD is committing to matching/redeploying as many affected staff as possible, retaining the skills and experience of our valued team members. All efforts will be made to match affected staff to similar positions, however where affected staff are not matched to any vacant/new positions, they will be referred to the Workforce Mobility Program.

I welcome everyone's contribution as we progress through the consultation period and take the opportunity to thank you in advance for your review of the proposal.

## 2. Overview of SESLHD

### 2.1 Background

SESLHD is one of the largest local health districts in Sydney, covering a geographical area of 468 square kilometres from Sydney's Central Business District to the outskirts of the southern suburbs. We provide health care to over 930,000 residents and, in addition, provide support for residents of Lord Howe Island. SESLHD manages nine hospitals and a range of high-quality, community-based health care services.

Our District has the following hospitals:

1. Prince of Wales Hospital
2. St George Hospital
3. The Sutherland Hospital
4. Royal Hospital for Women
5. Sydney and Sydney Eye Hospital
6. Garrawarra Centre
7. War Memorial Hospital
8. Calvary Hospital
9. Gower Wilson Memorial Hospital on Lord Howe Island

Our staff also deliver high quality health care across a variety of community-based services ranging from pre-birth to palliative care.

We are home to a diverse population which is set to increase to 1,022,000 by 2027 (20% growth). In our community 30% of people are from non-English speaking backgrounds, 37% have long-term health conditions and 8720 identify as being Aboriginal.

At the heart of everything we do is a set of values: Collaboration, Openness, Respect and Empowerment.

## 2.2 Case for Change

In FY23/24 SESLHD implemented a series of cost savings initiatives to meet budget expectations, however despite these efforts, the District has had a significant budget over-run. Compounding this, the budget for FY24/25 presents a series of constraints amongst a broader context of whole of government savings initiatives, cost pressures and minimal growth. To support the savings initiatives, the District proposes a management and administrative reduction strategy which proposes to delete FTE equating to \$7.5 million in salaries savings per year. A proportional reduction in FTE across all management and administrative structures in the District will enable this to be targeted and ensure we do not affect frontline clinical service delivery and safety. The efficiencies will be delivered across the District, recognising efficiencies within each directorate, site or service.

The aim of the restructure is to:

- improve administrative efficiency and effectiveness
- enable strong local management that facilitates responsiveness and clear outcomes
- provide clear lines of communication for operational and professional accountability
- ensure decisions are made as close as possible to the site/service level
- reduce silos and facilitate a connection between the strategic priorities, planning and operations
- meet our obligations to support government savings initiatives.

The proposed restructure will adhere to, and reflect the NSW Government, NSW Health and Ministers' strategic priorities, Award and Policy requirements.

### 3. Impact

Given the scale of the change, implementation was planned in two phases. Phase 1 was proposed in July 2024 and is currently being implemented, and Phase 2 will commence consultation from mid-September. The impact across the facilities and directorates is varied based on the allocation. The proposal has considered a proportional allocation of FTE based on the Health Manager establishment. Given this, the allocation is more heavily weighted to District directorates rather than the facilities. There is no impact on frontline clinical services as a result of these proposed changes.

Proposed changes in Phase 2 focus on the opportunity to integrate functions for greater budget efficiencies and operational benefits. During the Phase 2 consultation process, we will be proposing service changes across the district in conjunction with reviewing positions.

In Phase 1, the District deleted 36.39 full time equivalent (FTE) positions and created 9 FTE with a net reduction of 27.3 FTE. In Phase 2, the District proposes to delete 77.85 full time equivalent (FTE) positions and create 51 FTE with a net reduction of 26.85 FTE.

Within Phase 2 there are significant changes to the delivery of finance services and the management of clinical streams.

#### Summary

In summary, the indicative breakdown of directorates/facilities, and classifications impacted in Phase 2 is as follows, noting some directorates/facilities will have impact spread over both phases:

Position Classification	FTE
Health Managers	22.84
Administration Officers	20
Nurse Managers	4.63
Telephonists	23.69
Others	6.34

<b>Phase 2:</b>	People and Culture, The Sutherland Hospital, St George Hospital, Prince of Wales Hospital, Royal Hospital for Women, Mental Health, Population and Community Health, District Nursing and Midwifery, Corporate Services, Operations Directorate, Strategy Improvement and Innovation, District Finance Directorate.

## 4. Finance Consolidation

Currently financial functions are delivered across the District in a hybrid model, with a combination of central functions, business partnering models and local finance teams. Reconsidering how we can deliver financial services and support from a functional perspective, there are efficiencies that can be gained in the way we work across our District. Refer Table 1 for a breakdown in revised functional responsibilities in the proposed finance operating model.

Table 1:

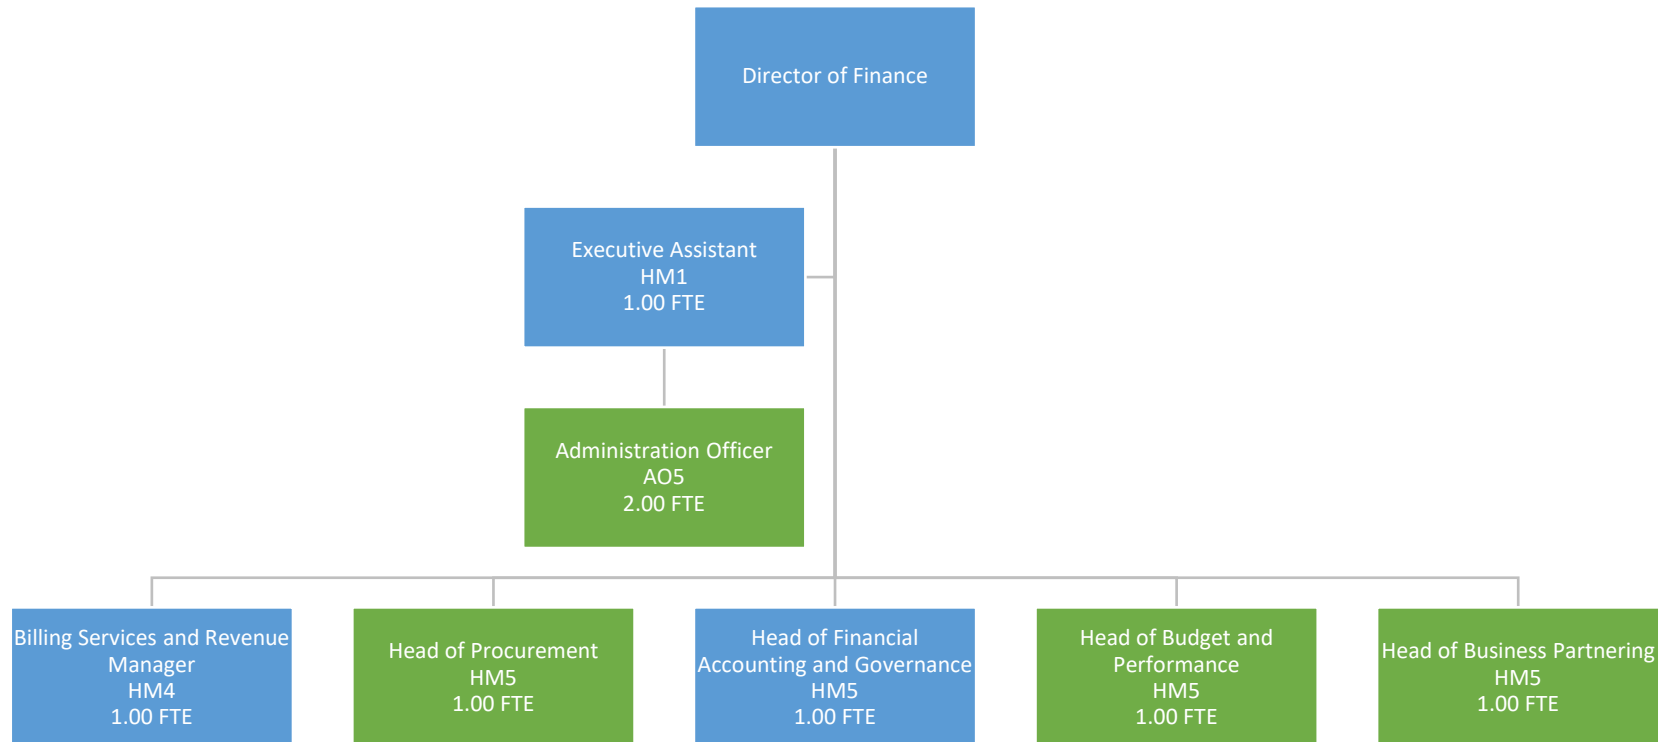

<b>Procurement</b>	<b>Revenue / Billing</b>	<b>Financial Accounting &amp; Governance</b>	<b>Budget &amp; Performance</b>	<b>Business Partnering</b>
Head of Procurement (HM5) <ul style="list-style-type: none"> <li>• Clinical Products Procurement</li> <li>• Corporate Products Procurement</li> <li>• Procurement Policy, Contract Compliance and Projects</li> </ul>	Billing Services & Revenue Manager (HM4) <ul style="list-style-type: none"> <li>• Site Patient Billing Lead(s)</li> <li>• Cashiers</li> <li>• Billing Operations</li> <li>• Accounting and reporting</li> <li>• RFA and Taxation</li> <li>• Revenue Systems and Compliance</li> </ul>	Head, Financial Accounting & Governance (HM5) <ul style="list-style-type: none"> <li>• Financial &amp; Statutory Reporting team</li> <li>• Capital Projects and Balance Sheet team</li> <li>• Accounting Policy and Financial Controls</li> </ul>	Head of Budget and Performance (HM5) <ul style="list-style-type: none"> <li>• Budget Management and control</li> <li>• Reporting and Analytics</li> <li>• Costing and Benchmarking</li> </ul>	Head of Business Partnering (HM5) <ul style="list-style-type: none"> <li>• Larger sites / services</li> <li>• Snr Business Partner HM4</li> <li>• Supported by embedded BP teams (HM3)</li> <li>• Smaller Sites / services</li> <li>• Business Partner HM3</li> </ul>

By taking a function-based approach, there are clearer and more consolidated responsibilities for teams and individuals. It is expected this will reduce duplication and better allow teams to focus on their core responsibilities, significantly reduce the re-work associated with many of our financial processes and deliver a more efficient and equitable financial environment.

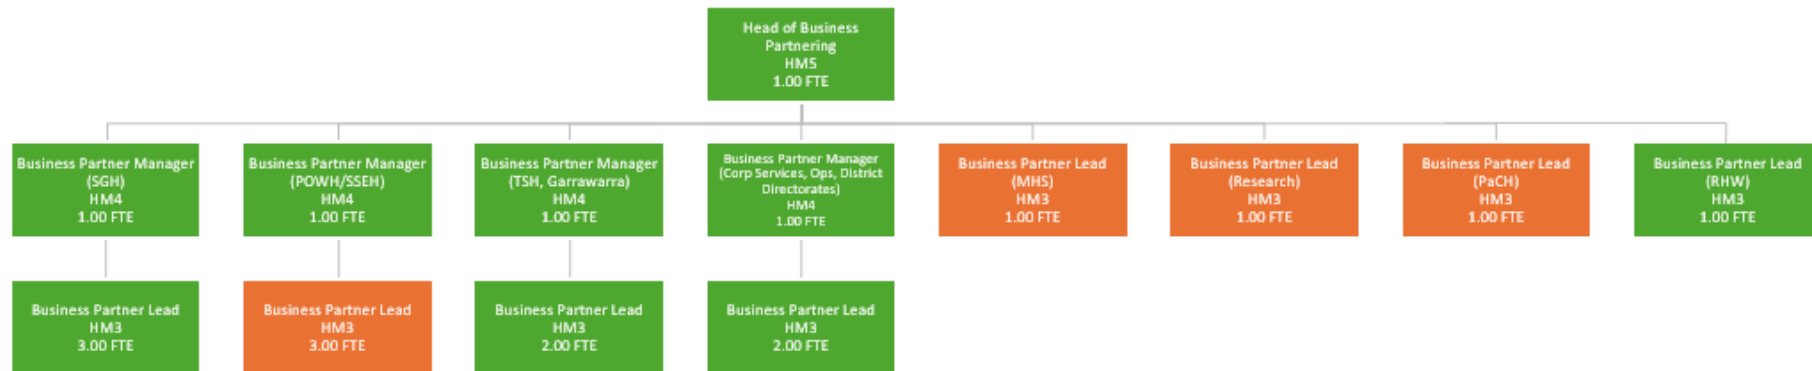

While there are new roles created and changes of reporting lines, site and service-based business partnering roles will continue to be embedded with our frontline teams, offering a more focussed business partnering model through the entire year, without some of the competing demand the current approach places on individuals. It is expected that finance leads within sites, services and directorates will continue to be part of executive teams, supporting local decision-making. These changes do not impact on delegations or reduce local decision making within the current operating environment. Rather, the proposed changes will better support this, given the clear focus and dedicated resource partnering with the business.

A consistent approach to budgeting is essential in ensuring there is a fair and equitable distribution of the available funds. In spite of efforts to achieve this to date, the current devolved model drives local variation that ultimately leads to significant re-work, a misdirected focus on budget rather than business support, and ultimately an inability to support clinical services across our service equitably. This revised approach will ensure there is a clear, transparent budget process that ultimately ensures a consistent allocation to each site, service and directorate. There is no change in delegations, hence this change in function will not impact on how local leaders would like to spend the allocated budget, consistent with the delegations manual.

#### 4.1 Proposed Organisational Chart – Leadership Team, District Finance

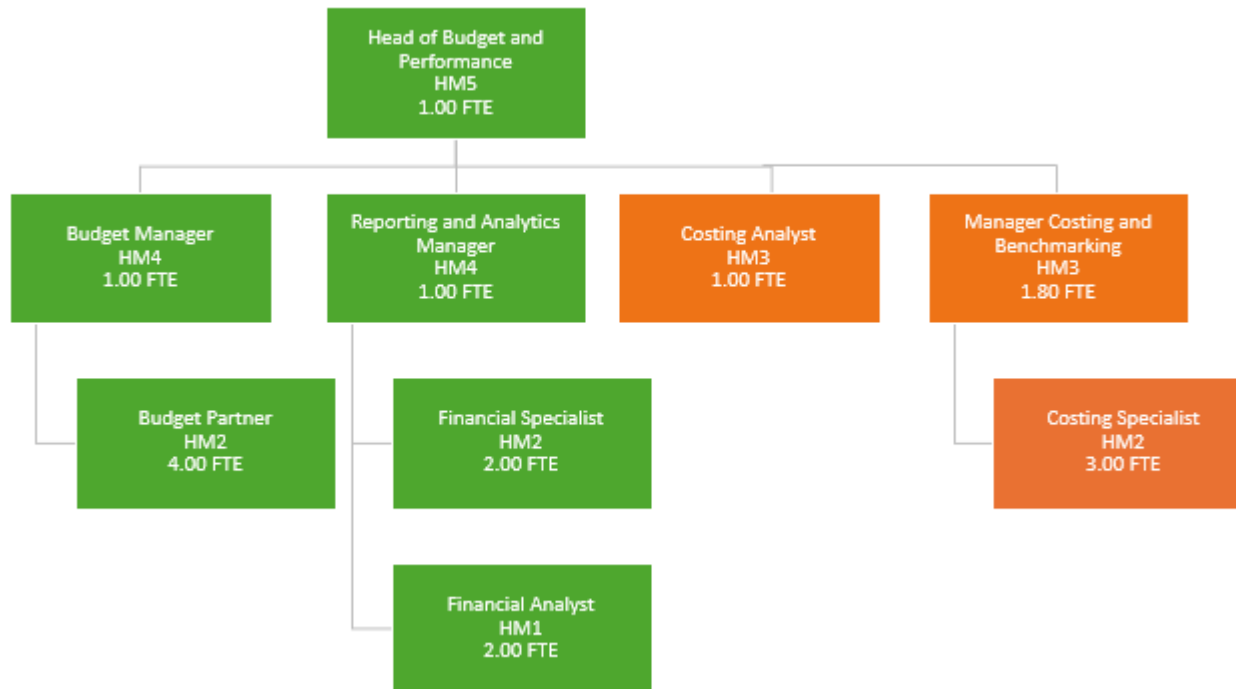

## 4.2 Proposed Organisational Chart - Business Partnering Team, District Finance

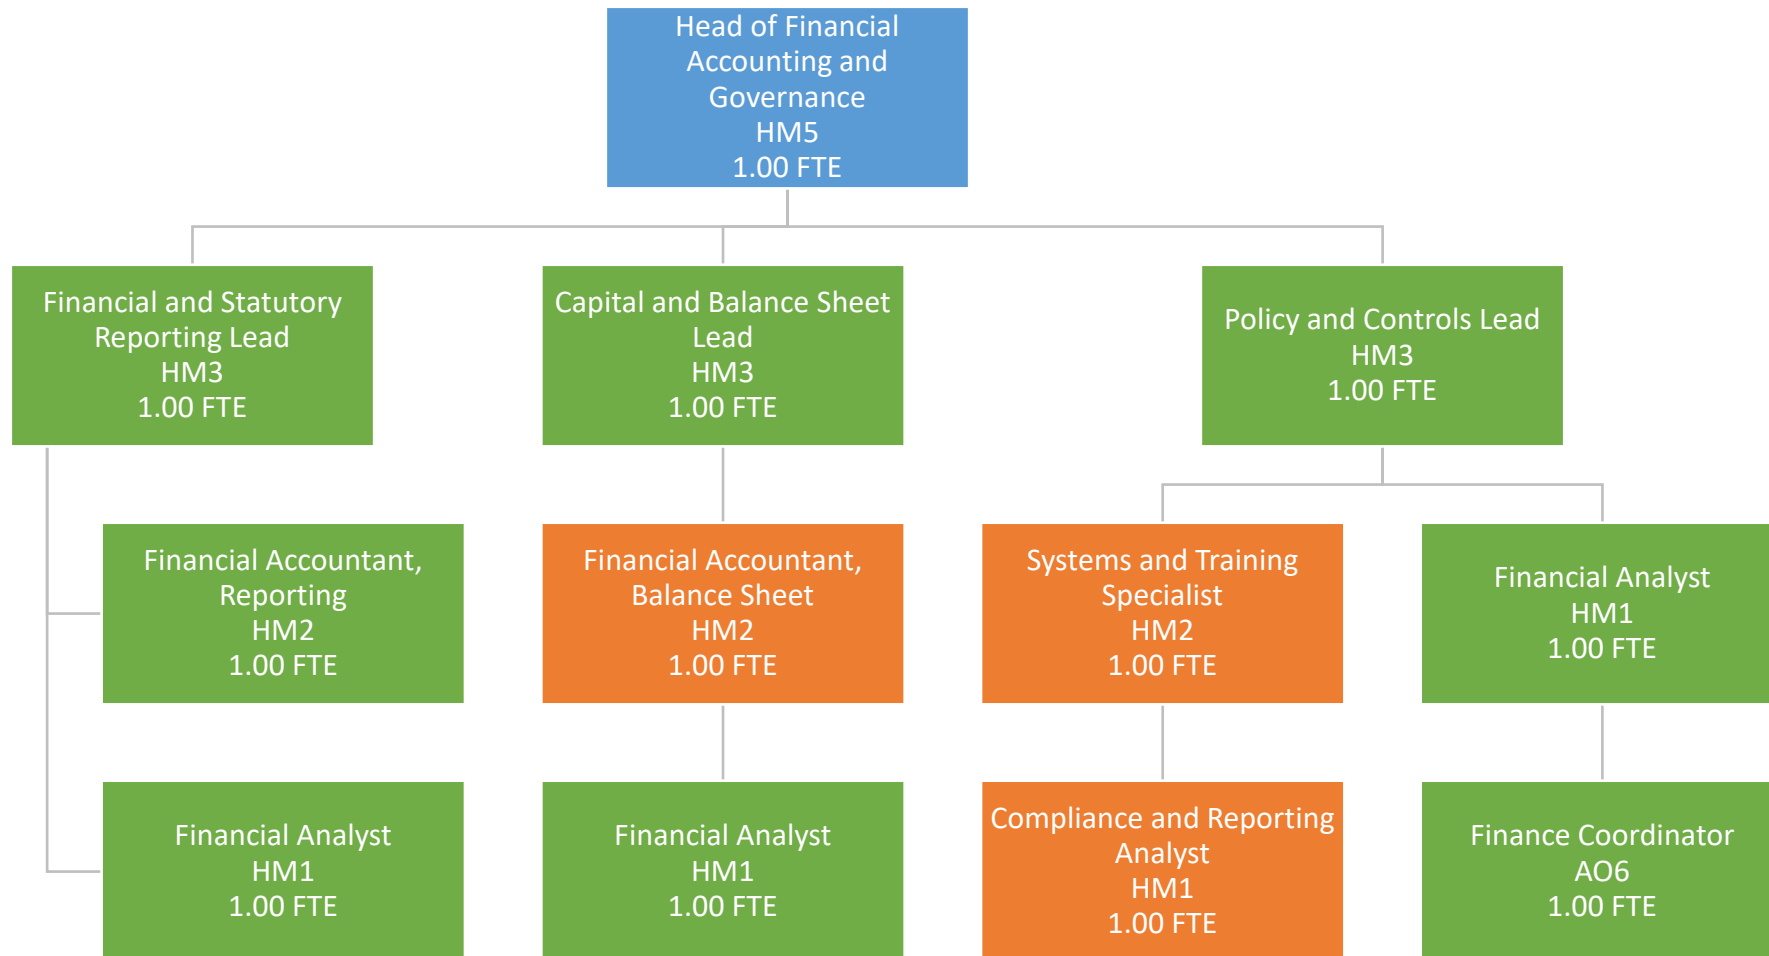

- Site and service-based business partnering roles will continue to be embedded with frontline teams.
- Finance leads within sites, services and directorates will continue to be part of executive teams, working on a day to day basis to the relevant GM or Director to support local decision-making.

## 5. Clinical Streams

Clinical streams are incredibly important in ensuring we achieve our strategic priorities as outlined in *Exceptional Care, Healthier Lives*. We consistently hear from our community their concerns regarding the ‘postcode lottery’ and the inconsistent delivery of our services. Also, as we know there are a number of clinical challenges we will face as outlined in the *SESLHD Health Care Services Plan* that will require us to work together across the delivery to ensure our services are sustainable and the specialist workforce needs are met.

However the effectiveness of our Clinical Streams is often challenged by the authorising environment that they operate in. It is proposed to reorganise Clinical Stream structures to better facilitate decision making and implementation of programmes of work by pairing Clinical Directors with General Managers or Directors. This structural change, supported by largely existing project and change management resources, will ensure that priorities of the Clinical Streams are aligned with priorities of our operational executives, improving both the effectiveness of the streams and reducing the challenges around implementation.

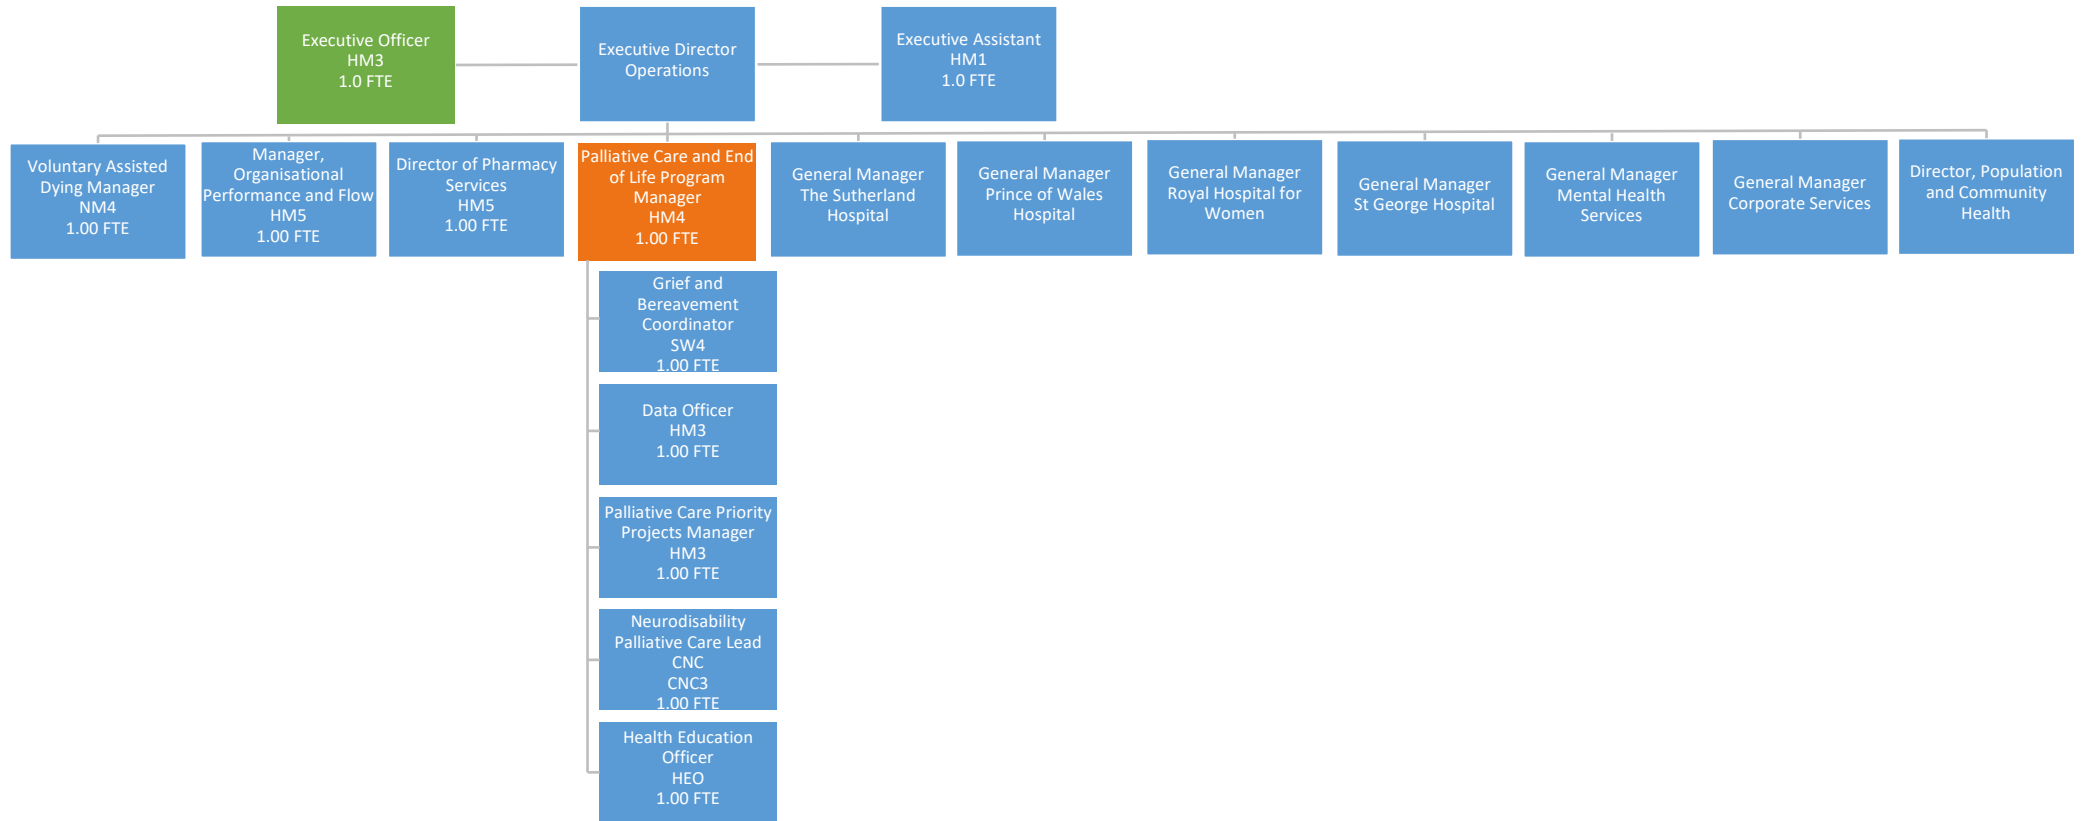

An indicative structure of how this will work is included below:

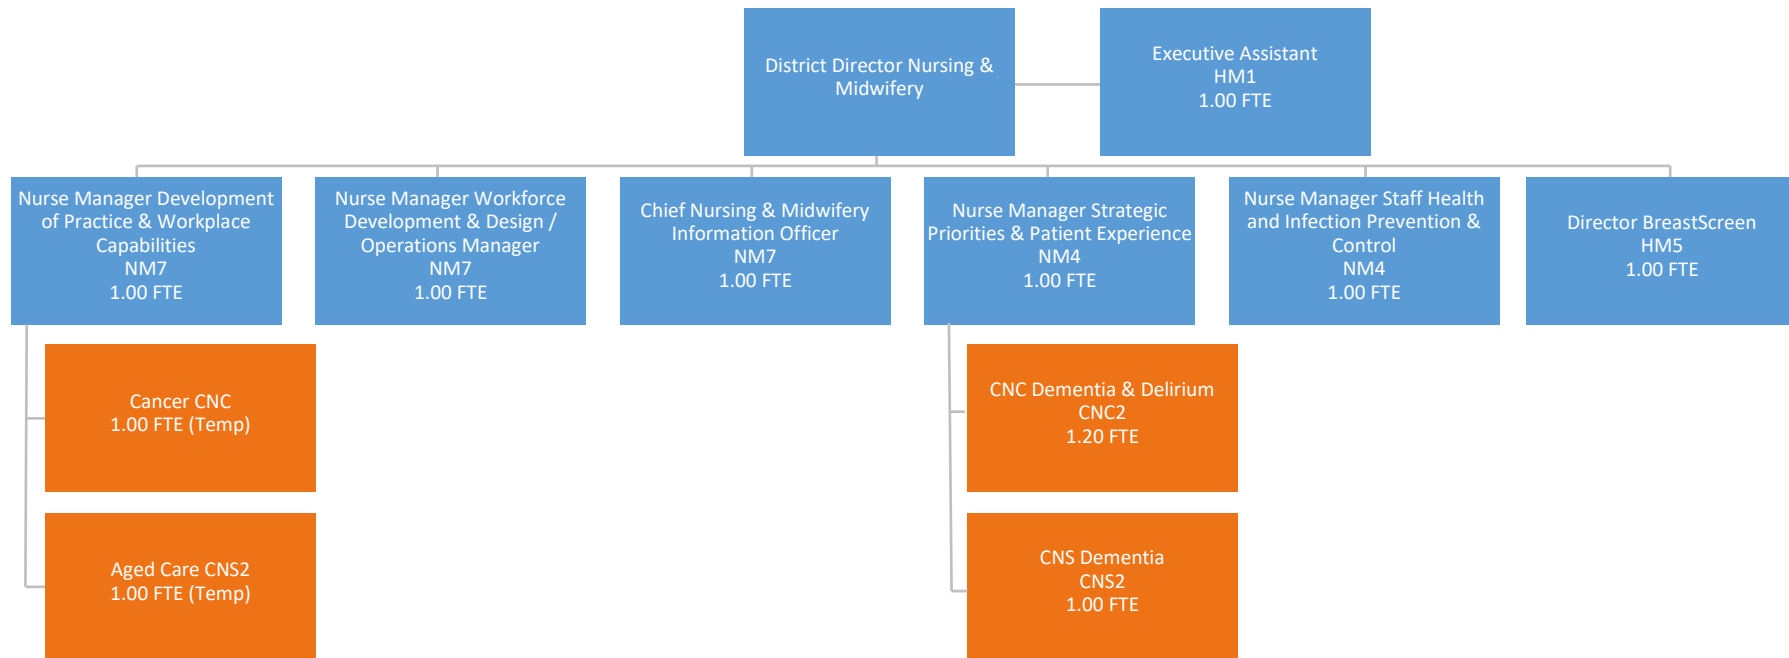

As detailed, the resources supporting the Clinical Streams will include: the Priorities Project Manager role, currently embedded within most sites and services and working in partnership with the leadership team; and a Change Manager role, currently working in partnership with the clinical streams across a majority of the project initiatives underway. The Priorities Project Manager will continue to balance their current site based responsibilities and will work in partnership with the GM/Director to prioritise activities. Change Manager positions have a district wide remit and are therefore positioned appropriately to work with key stakeholders across the district to deliver stream priorities. The alignment of a specific Change Manager to each 'Stream Team' will ensure continuity and consistency in project delivery and stakeholder engagement.

It is expected that the GM/Director, Medical Co-Director, Project Manager and Change Manager will work together to support delivery of defined clinical stream priorities. The purpose of this approach is to ensure robust project management and change management approaches are undertaken for priority projects across all relevant sites and services within the district. The combination of project and change management dedicated to each stream with consistent and complementary skillsets will ensure the successful delivery of change.
