

# WEBINAR

## Meet the midwives: STORC team case studies and Q&A

### Event Information:

22 October 2024

Time:  
15:00 - 17:00 ADST

Online: 120 mins  
interactive CPD

This webinar is presented by the State Obstetrics Referral Call (STORC) team from St John WA.

The STORC team will present some of their recent case studies about cord prolapse, preterm twins born at home, and at home breech birth. They will also give the audience a chance to ask questions about all things obstetrics.

Please note that although the presenters are from WA, the content is applicable and valuable to paramedics across Australasia.

# NEW COURSES

## Recreational drug toxicology: Tales from the Emerging Drug Network of Australia (EDNA)

Dr Jessamine Soderstrom from the Emerging Drugs Network of Australia (EDNA) looks at new and emerging recreational drugs and their toxicology.

## Severe burn preparedness

This course contains two presentations related to severe burns and will highlight the preparedness in paramedicine and pre-hospital practice.

## Airway excellence: Tips and tricks for routine, trauma, and obstetric airways

This course focuses on providing tips and tricks to use in routine airway management but will also delve into navigating difficult airways in trauma and obstetrics.

## Let's talk about RSI

This panel discussion reviews various approaches to performing Rapid Sequence Intubation (RSI) and the medication choices pre and post RSI.
