1. Overview of SESLHD Strategy, Innovation and Improvement and Digital Health

1.1 Background

The Strategy, Innovation and Digital Health Directorate (SIDH) will bring together the Strategy, Innovation and Improvement Directorate and the Digital Health Directorate for a two-year period while the Director of Digital Health is on secondment. Synergies across the two directorates will be realised through this restructure.

The original Strategy, Innovation and Improvement Directorate consists of three main pillars – Planning and Partnerships, Change and Innovation, and Clinical Insights and Analytics, supported by the Business Support Team and the Executive Assistant role. The Virtual Health team is responsible for the implementation of the Virtual Health Strategy. The directorate is responsible for leading, managing and directing major project initiatives and high priority strategies requiring a whole of district perspective to successfully deliver required outcomes.

The directorate encompasses strategy and planning functions, analytics and project management resources to ensure strategic allocation of resources to key organisational priorities and initiatives. It drives and enables the delivery of key strategic and operational initiatives by developing innovative solutions to improve the quality and efficiency of service delivery. The directorate oversees the development of organisation strategies and plans, while also monitoring the implementation of such plans.

The original Digital Health Directorate is a shared service providing information and communication technology (ICT) services to

- The Illawarra Shoalhaven Local Health District (ISLHD) and
- The South Eastern Sydney Local Health District (SESLHD)

Digital Health delivers a digitally enabled, integrated healthcare and support service that facilitates the provision of a digital environment for SESLHD and ISLHD staff and patients. The directorate is organised around the key deliverables of Investment and Demand Management, Business and Technology Services, Application Services, Risk and Cyber Security and Business Planning and Development. These teams work closely with clinical and business partners to deliver a viable ICT service.

Services include:

- Monitoring the performance and condition of hardware and software
- Maintaining the infrastructure supporting hardware and software
- Ensuring proper data integration support amongst ICT components and elements
- Ensuring infrastructure-compatible ICT equipment is purchased and deployed

Ref: T24/31737 Version **1.1** Page **5** of **24**

Professional business support is provided to SESLHD and ISLHD in:

- ICT demand and request investigation to ensure value for money in ICT initiatives.
- ICT program and project management to make sure approved works are managed for success.
- Applied knowledge in Cyber Security to keep our patents and staff safe from cyber attacks.

1.2 Current Organisation Structure

The current organisational structure of the SII and Digital Health directorates, and respective services in scope for the proposed restructure and position changes are shown on the following pages.

1.2.1 Current Organisation Charts

SII Leadership and SII Director Direct Reports

SII - Business Support Operations

1.3 Case for Change

The decision to temporarily merge the SII and Digital Health Directorates also provides an opportunity to align complementary functions of each Directorate. Specifically, the Business Support Operations, Administration, Applications Services and Clinical Insights and Analytics Teams will be able to effectively coordinate work and deliver on priorities in a revised structure that brings together similar functions under the same reporting lines.

Since the formation of the current SII structure, the strategic direction of the organisation has been further developed in the SESLHD 2025 Strategy *Exceptional Care, Healthier Lives*, the *SESLHD Health Services Plan* and the *SESLHD Virtual Health Strategy*.

- The Virtual Health Team has been created to implement the Virtual Health Strategy, working closely with the operations team in the Community Management Centre (CMC), hosted by the Prince of Wales Hospital.
- Major bodies of work (e.g. Improvement Framework, Environmental Sustainability Plan) are also moving from the design to delivery stage, which requires a different organisational alignment to support effective implementation.

The current workload and reporting lines across all pillars have been examined. Changes are proposed to reporting lines to better support People Managers in the balance of individual project and business as usual (BAU) deliverables alongside effective and supportive management of the people within their teams.

Clinical Insights and Analytics (CIA)

The CIA team has seen a notable turnover of experienced staff in recent years amidst a significant increase in work complexity. The team is responsible for delivery of the local response to the Ministry of Health Enterprise Data Warehouse (EDWARD) program, development of dashboards to provide clinical and corporate information to the organisation, and regular and adhoc performance and operational analytics and reporting. More recently the team has also developed clinical and statistical analytics functionality. The team has been significantly challenged in building a governance and process framework that allows it to deliver on SESLHD's strategic direction to ensure our clinicians, managers and executives can access business information and analytics through a self-service platform that provides a respected and trusted single source of truth. The increasing pace of technological change, and the increasing reliance on datainformed decision-making, highlights the challenges in balancing infrastructure development and analytics capability within the one team. A key challenge for the leader of the CIA team is staying current with technology, particularly cyber security, and delivering a stable technology platform that operates seamlessly (especially from a service management framework) with other systems accessed by the SESLHD workforce.

Change and Innovation (C&I)

The Change and Innovation pillar has built broad capability and capacity across the organisation in change and project management. The team works directly with executive and clinical leadership at sites and services through embedded project manager resources and providing change and project management leadership for complex cross-Dis. The C&I team are also responsible for building capacity and

Ref: T24/31737 Version **1.1** Page **10** of **24**

capability in change management across SESLHD, including delivering training in Redesign, JumpStart and Accelerating Implementation Methodology (AIM). The expectations and demand on the team have grown significantly as the organisation's strategic ambitions have developed. While the team has established career pathways for project and change managers, it has proven challenging to resource the Innovation Manager role and work on developing an Innovation Framework has not progressed. It is also recognised that the skills required to lead and deliver the design of frameworks (including Improvement, Innovation and Environmental Sustainability) are different from those required for the implementation of the frameworks and the current structure does not provide the necessary support for implementation.

Planning and Partnerships (P&P)

The Randwick Health and Innovation Precinct (RHIP) represents a unique opportunity to leverage the combined strengths of SESLHD, the University of NSW, the Sydney Children's Hospitals Networks, and Medical Research Institutes, to benefit the district and the broader health system. The P&P team will strengthen the RHIP collaboration alongside relationships with key government and primary care partners to develop the SESLHD Partnership Framework. The team is also responsible for strategic business planning, the evaluation and monitoring of the district strategy and the creation of clinical and service plans that articulate the direction of the district. Challenging longheld beliefs and practice, bringing thought leadership to conversations with clinicians and other stakeholders, and building support for ambitious and achievable recommendations are the key deliverables for this group. Continued investment in the development of the team's deep planning skills is required to sustain the planning workforce.

Virtual Health

The Virtual Health team implements the Virtual Health Strategy. The team works in collaboration with the Prince of Wales Hospital (POWH) operational team to develop virtual health models that can be scaled across SESLHD, delivered through the central Virtual Health Hub hosted by POWH. The relationship between the Change and Innovation Pillar and the Virtual Health team is pivotal, with each having responsibility for changing models of care and service delivery, and strong networks throughout the sites and services.

Business Support Operations and Administration

At present, these two teams provide administrative and project support, and management of events, across the SII and Digital Health directorates. Maintaining these as two separate teams introduces the potential for confusion with internal and external stakeholders about where to direct executive correspondence and where responsibility for different functions lies. It also increases the likelihood of disparate processes and procedures remaining in place across the directorate, undermining the ability to operate as one team.

Ref: T24/31737 Version **1.1** Page **11** of **24**

2.1 Proposed Organisation Structure

The proposed Strategy Innovation and Digital Health structure has been informed by thorough analysis of the resources required to deliver on the *Exceptional Care*, *Healthier Lives* Strategy and the *SESLHD Health Services Plan* while maintaining business as usual activities. It also seeks to realise the synergies in merging the SII and Digital Health Directorates.

Key considerations in determining the structure:

- A senior leadership team will continue to lead the pillars and be responsible for 'hands on' leadership of significant and complex programs of work.
- People Leader roles will continue to be responsible for the management, coaching and development of their team members, and for 'hands on' delivery of projects and business as usual requirements.
- The Virtual Health Team continues as part of the Change & Innovation Pillar, to foster strong collaboration between change and project team members in SIDH.
- Responsibility for the design and delivery of the Innovation Framework will rest with the Head, Change and Innovation, supported by the Strategic Change Manager, Strategic Programs Manager and a dedicated Project Manager.
- Delivery of the Environment Sustainability Plan by the Environmental Sustainability Project Officer will be supported by the Strategic Programs Management team.
- A realignment of the Strategic Projects Management team will see the Strategic Projects team responsible for site specific initiatives and the Strategic Programs team responsible for framework implementation and management of district wide projects.
- The CIA team responsible for the Data Warehouse and Business Intelligence
 platforms will be realigned to the Applications Services team, promoting
 alignment with the technical and project management resources required for the
 successful delivery of these functions.
- A new position of ABF and Reporting Manager will lead critical operational functions including the management of the Activity Based Funding (ABF) process in coordination with site and service performance units.
- Career development within and across each pillar has been considered.

The Directorate will retain its key pillars:

- Analytics and Reporting (formerly Clinical Insights and Analytics)
- Application Services
- Business Technology Services
- Change and Innovation
- Investment and Demand Management
- Planning and Partnerships

The Directorate will be well supported by the following teams:

- Business Planning and Development
- Business Support and Administration
- Risk and Cyber Security

3.2 New Positions

No.	Position Title	Summary of Proposed Change
1	ABF and Reporting Manager HSM4 (pending grading)	New position created with responsibility for the delivery and continuous improvement of the ABF and reporting functions within the Analytics and Reporting team. Creation of this role will ensure sufficient capacity is available for the delivery of business-as-usual activity and reporting management. Reporting to Head Analytics and Reporting.
2	Project Manager HSM3	New position created to support the design and delivery of the Innovation Framework. Taking on responsibilities from the Innovation Manager role. Reporting to Strategic Programs Manager.
3	Platforms Product Manager HSM3 (pending grading)	New position created to support the development and potential commercialisation of platforms including Research Operations Data Environment (RODE). Reporting to Business Intelligence Data Solutions Manager.

3.3 Positions with Changed Responsibilities

No.	Position Title	Summary of Proposed Change
1	Analytics Service Lead HSM4	Title change to Analytics Service Manager. Relinquishing responsibility for ABF and reporting functions will allow this role to focus on the delivery of advanced performance and operational analytics for the broader business and address existing capacity issues within the team.
2	Manager, Clinical Insights and Analytics HSM5	Title change to Head, Analytics and Reporting. Relinquishing responsibility for data warehouse and business intelligence functions will provide the capacity to strengthen the analytics and reporting capability of the organisation. It is expected that this capability will improve from a constrained and reactive function to a proactive and insight led engagement with the organisation.
3	Head, Application Services HSM5	Taking on the responsibility for development and maintenance of the data warehouse and business intelligence functions.

Ref: T24/31737 Version **1.1** Page **20** of **24**

3.4 Positions with Title Changes Only

No.	Position Title	Summary of Proposed Change
1	Change and Innovation Lead HSM5	Title change to Head, Change and Innovation to provide consistency of titles in the senior leadership team across the Directorate.
2	Planning and Partnerships Lead HSM5	Title change to Head, Planning and Partnerships to provide consistency of titles in the senior leadership team across the Directorate.
3	Analytics Lead HSM4	Title change to Clinical Analytics Manager to provide consistency of titles in the people management team across the Directorate.
4	Strategic Projects Manager	Title change for 1 FTE to Strategic Programs Manager to differentiate the two work streams.

3.5 Deleted Positions

No.	Position Title	Summary of Proposed Change	Filled	Incumbent affected
1	Innovation Program Manager HSM3	Vacant roles deleted. Functions to be transferred to new Projects Manager role, supported by Strategic Project and Change Managers.	No	No
2	Project Officer HSM2	1 FTE vacant role (previously reporting to Change and Innovation Lead) to be deleted.	No	No
3	Virtual Health Financial Modeller HSM3	Vacant role to be deleted.	No	No
4	Roadmap Delivery Manager	Vacant role to be deleted.	No	No
5	Systems Project Coordinator HSM1	Vacant role to be deleted.	No	No
6	Research Ethics and Development Manager HSM3	Role to be deleted. Functions transfer to new role Platforms Product Manager, reporting to Business Intelligence and Data Solutions Manager. Incumbent to be matched to the new role.	Yes	Yes

4. Consultation

Development of the Proposal

The proposal has been developed through discussion and consultation with the leadership team across Strategy, Innovation and Digital Health.

Consultation Plan

A consultation period will run for three weeks to allow for review and discussion. The paper will be presented to the Directorate in a team meeting, and discussions will continue in team and individual meetings. Individuals will be encouraged to provide feedback in writing or in direct discussion with their line manager of the Director SIDH.

Drimon	(Mandatory)	The vision for South Eastern Sydney Local Health District (SESLHD) is 'exceptional care, healthier lives'. SESLHD is committed to enabling our community to be healthy and well, and to providing the best possible compassionate care when people need it.
Primary Purpose of the role* A concise summary of the primary purpose of the role, answering the question: "Why does this role exist?"	(Free text)	The Head, Analytics and Reporting will provide strong leadership, strategic direction and governance in the delivery of systematic, accurate and consistent reporting across SESLHD combined with accurate and fit-for-purpose analysis to support research, performance reporting and strategic service management. The position will work collaboratively with clinical directors, and data stakeholders across SESLHD and NSW Health to generate valuable insights, improve the quality of data analysis and coordinate strategy development in relation to the improvement of service performance reporting and monitoring in accordance with SESLHD's operational priorities, strategic goals and Ministry of Health (MoH) service level agreement. The position will lead and drive the Analytics and Reporting Unit (ARU) core functions to deliver high quality, relevant, cost effective and timely integrated analytics driven insights and services.

SESLHD District Form F370 Page **1** of **9**

Section 2 - Key Accountabilities

Section 2 – Key Accountabilities						
Standard Key Accountabilities*	(Free Text)	 Facilitate engagement, innovation, quality and safety in services that comply with statutory requirements, NSW legislation/policies and best practice to meet the diverse and complex requirements of clinical and corporate streams within the district. Implement and maintain the data and analytics strategy, by driving continual improvement in the analysis and use of data, strengthening data capabilities, and promoting data literacy throughout the district. Lead the delivery of complex reporting and analytics projects by effectively scoping and planning requirements, leading the design, development, testing and deployment of end solutions for quality assurance and user acceptance. Lead mandatory reporting responsibilities for the Chief Executive and Executive Leadership Team including obligatory compliance, MoH and strategic reporting. Manage development of data assets the support the district's vision, values and strategic priorities through system enhancement, monitoring, evaluation and reporting on outcomes whilst providing strategic and statistical advice on activity, performance trends and opportunities for service improvement to ensure compliance with all regulatory reporting requirements. Provide operational oversight of Activity Based Management (ABM) analytics processes including providing guidance and quality assurance for all processes. Provide high level expertise and advice in relation to advanced analytics and reporting best-practices, including support for organisational data use, to ensure business objectives are met using best practice principles. Collaborate with and influence clinical and technical teams across the district in relation to gathering data requirements, promoting data use, and to propose and implement new and creative ways to utilise data. Develop, maintain and identify opportunities to forge productive strategic relationships with executives, clinicians, managers and other key stakeholders to ensure an				

	 impartially and with integrity and by actively advocating organisational principles and values, to ensure that Health Service and Government expectations are met. Maintain responsibility for personal and professional development by participating in training/education activities and performance reviews/appraisals in order to continuously improve the level of management and leadership in the service. All staff are expected to take reasonable care that their actions do not adversely affect the health and safety of others, that they comply with any reasonable instruction that is given them and with any reasonable policies/procedures. Comply with and implement the NSW Health Work Health and Safety Better Practice Procedures by identifying, assessing, eliminating/controlling and monitoring hazards and risks within the workplace, to the extent of delegated authority for the role.
--	--

Section 3 – Key Challenges

Challenges	 Working in a complex and ever changing environment to deliver critical business systems while engaging numerous clinicians and managers across SESLHD. Facilitating the increased requirement for provision and use of quality data for activity based management, activity based funding and performance reporting. Managing a number of projects concurrently, with varying timeframes and workloads, within a high volume working environment, across multiple facilities/locations.
Decision Making	 The Head, Analytics and Reporting has substantial autonomy in the management of staff and other resources of the Analytics and Reporting Unit including managing the performance of others to achieve work objectives. Undertakes negotiations around timelines for delivery of services.
Communication	 Internally, the Head Analytics and Reporting is required to communicate regularly with clinicians, clinical leaders, facility/service leadership and SESLHD executive to achieve work objectives. Externally, the Head, Analytics and Reporting will develop and maintain effective relationships with NSW Health and Ministry representatives to achieve business objectives. Provide leadership which supports workforce reform using effective communication strategies.

Section 3 – Key Challenges

Challenges	Leading or facilitating consultations with internal and external stakeholders often
	where there are competing needs/objectives.
	Balancing limited resources to meet competing priorities and expectations and
	managing a high-volume workload while at the same time delivering agreed project
	outcomes.
	Managing time and prioritising issues, given the diverse range of issues
	encountered simultaneously and work demands flowing from a number of sources.
Decision	Capacity to manage own workload and make informed decisions, working to tight
Making	and often changing deadlines and to ensure risks and issues are escalated in an
	appropriate and timely manner
	Undertake negotiation and use influencing skills to achieve an outcome which is
	beneficial to all whilst ensuring work objectives and delivery of milestones are
	achieved within defined timelines.
Communication	Communicate internally with General Managers and local site executive, operational
	service managers, heads of department and local teams and the SIDH Director and
	leadership team on project management, risk mitigation, outcomes, milestones and
	reports as well as communication to senior executives regarding coordination and
	progress of business planning priorities.
	Communication externally with Facility Service Partners, relevant stakeholders from
	other LHDS, Ministry of Health and pillar agencies related to implementation of
	policies, responding to formal requests and collaborating on shared priorities.

Section 10 – Disqualification Questions

Disqualification questions are questions that relate to mandatory requirements for a position. These are requirements that should prevent a candidate from submitting an application. Desired requirements can be added as pre-screening questions.

Disqualification	Currently Unavoilable	
Questions	Currently Unavailable	

Section 11 - Job Demands Checklist

The purpose of this checklist is to manage the risk associated with the position in relation to the occupant. It may be used to provide information about the position to a Health Professional required to perform a preemployment medical assessment.

PHYSICAL DEMANDS - Description (Comment)	FREQUENCY
Respirator use - Wearing of a respirator, to ensure protection against exposure to respiratory pathogens/ hazardous materials	Infrequent
Sitting – remaining in a seated position to perform tasks	Constant
Standing – remaining standing without moving about to perform tasks	Frequent
Walking – floor type: even/uneven/slippery, indoors/outdoors, slopes	Occasional
Running – floor type: even/uneven/slippery, indoors/outdoors, slopes	Infrequent
Bend/Lean Forward from Waist – forward bending from the waist to perform tasks	Occasional
Trunk Twisting – turning from the waist while sitting or standing to perform tasks	Frequent
Kneeling – remaining in a kneeling posture to perform tasks	Not Applicable
Squatting/Crouching – adopting a squatting or crouching posture to perform tasks	Infrequent
Leg/Foot Movement – use of leg and/or foot to operate machinery	Infrequent
Climbing (stairs/ladders) – ascend/descend stairs, ladders, steps	Occasional

SESLHD District Form F370 Page **5** of **6**

Lifting/Carrying – light lifting and carrying (0 to 9 kg)	Constant
Lifting/Carrying – moderate lifting and carrying (10 to 15 kg)	Infrequent
Lifting/Carrying – heavy lifting and carrying (16kg and above)	Not Applicable
Reaching – arms fully extended forward or raised above shoulder	Occasional
Pushing/Pulling/Restraining – using force to hold/restrain or move objects toward or	
away from the body	Constant
Head/Neck Postures – holding head in a position other than neutral (facing forward)	Frequent
Hand and Arm Movements – repetitive movements of hands and arms	Constant
Grasping/Fine Manipulation – gripping, holding, clasping with fingers or hands	Constant
Work at Heights – using ladders, footstools, scaffolding, or other objects to perform	1,2,6,2,2,1,2,12,4
work	Infrequent
Driving/Riding – controlling the operation of a vehicle (e.g. car, truck, bus, motorcycle,	Fraguent
bicycle)	Frequent
SENSORY DEMANDS - Description (Comment)	FREQUENCY
Sight – use of sight is an integral part of work performance (e.g. viewing of X-Rays,	Constant
computer screens)	
Hearing – use of hearing is an integral part of work performance (e.g. phone enquiries)	Constant
Smell – use of smell is an integral part of work performance (e.g. working with	Infrequent
chemicals)	
Taste – use of taste is an integral part of work performance (e.g. food preparation)	Infrequent
Touch – use of touch is an integral part of work performance	Frequent
PSYCHOSOCIAL DEMANDS - Description (Comment)	FREQUENCY
Distressed People – e.g. emergency or grief situations	Infrequent
Aggressive and Uncooperative People – e.g. drug/alcohol, dementia, mental illness	Infrequent
Unpredictable People – e.g. dementia, mental illness, head injuries	Infrequent
Restraining – involvement in physical containment of patients/clients	Not Applicable
Exposure to Distressing Situations – e.g. child abuse, viewing dead/mutilated bodies	Infrequent
ENVIRONMENTAL DEMANDS - Description (Comment)	FREQUENCY
Dust – exposure to atmospheric dust	Not Applicable
Gases – working with explosive or flammable gases requiring precautionary measures	Not Applicable
Fumes – exposure to noxious or toxic fumes	Not Applicable
Liquids – working with corrosive, toxic or poisonous liquids or chemicals requiring	Not Applicable
personal protective equipment (PPE)	N. (A . !' . I .
Hazardous Substances – e.g. dry chemicals, glues	Not Applicable
Noise – environmental/background noise necessitates people raise their voice to be	Infrequent
heard	Infraguant
Inadequate Lighting – risk of trips, falls or eyestrain	Infrequent
Sunlight – risk of sunburn exists from spending more than 10 minutes per day in	Infrequent
Sunlight Extreme Temperatures and representatives are less than 15°C or more than	Infraguent
Extreme Temperatures – environmental temperatures are less than 15°C or more than	Infrequent
Confined Spaces areas where only one egress (ascane route) exists	Infraguent
Confined Spaces – areas where only one egress (escape route) exists Slippery or Uneven Surfaces - greasy or wet floor surfaces, ramps, uneven ground	Infrequent
Inadequate Housekeeping - obstructions to walkways and work areas cause trips and	Infrequent
falls	Infrequent
Working At Heights – ladders/stepladders/scaffolding are required to perform tasks	Not Applicable
Biological Hazards – exposure to body fluids, bacteria, infectious diseases	Not Applicable Not Applicable
Diological Hazarus — exposure to body nulus, bacteria, infectious diseases	Mot Applicable

Facility/Service	South Eastern Sydney Local Health District		
Department	Strategy, Innovation and Digital Health		
Manager	Business Intelligence Data Solutions Manager		
Position Number	ТВА		
Cost Centre	182048		

Section 1 - Role Details

Does this role require Job Demand Check List?		YES
Position Description Title *:		Platform Products Manager
Does this role require Multiple Awards? Specific classifications (if applicable):		NO
	Award*	Health Managers (State) Award
Position C	lassification*	Health Manager Level 3
Job Category Co		Project Management
Job Classific	ation Coding (ROB)*	Project Manager
	oding (ROB)	N/A
Executive Leve		NO
	le manage or vise others?*	NO
Primary Purpose of the	(Mandatory)	The vision for South Eastern Sydney Local Health District (SESLHD) is 'exceptional care, healthier lives'. SESLHD is committed to enabling our community to be healthy and well, and to providing the best possible compassionate care when people need it.
role* A concise summary of the primary purpose of the role, answering the question: "Why does this role exist?"	(Free Text)	The Platform Product Manager will provide strong leadership, operational management and strategic development of nominated data and research platforms. The position will also foster new commercial partnerships, managing relationships to support the development of nominated platforms to achieve the strategic goals of the Strategy, Innovation and Digital Health (SIDH) portfolio and SESLHD, ensuring the delivery of an integrated and effective health services innovation. This role involves operational, financial, project and stakeholder management, facilitating the development of selected platforms within the local, state and national context.

SESLHD District Form F370 Page **1** of **9**

	The position will work with the SESLHD SIDH team and key
	stakeholders across SESLHD to ensure the efficient and effective
	achievement of platform deliverables that are consistent with the
	operational and strategic objectives set by the SESLHD Executive and
	relevant Governance Steering Committees.

Section 2 – Key Accountabilities

Standard Key Accountabilities* (Free Text)	 Define the vision for nominated platforms, align stakeholders around the vision and develop strategies to protect and build organisational and brand reputation Develop, maintain and identify opportunities within SESLHD and partner organisations to forge productive strategic relationships with staff, contractors, industry, sponsors and other key stakeholders and relevant agencies, through fostering existing, and establishing new, collaborative partnerships in order to ensure service and strategic objectives are met Consult with SESLHD and NSW Ministry of Health stakeholders in relation to data governance to ensure platform data governance practices are adhering to the agreed standards, LHD and State policies, and industry best practice. Ensure the intellectual property of the projects delivered meet the NSW Health Intellectual Property guidelines, and document new intellectual property as per the SESLHD Intellectual Property Policy. Lead and manage Platform development projects following project management methodology including business cases, project plans, tracking, and operational reporting to ensure projects outcomes and projected benefits are achieved on time and on budget Lead key Platform Development projects, including developing the scope, aims, objectives and key success factors and deliverables associated with each of the projects Define and negotiate stakeholder roles and responsibilities in project delivery and reporting requirements and maintain regular communications with the Local Executive and the SIDH Director. Support the development of Platform development implementation and change plans and establish a communication strategy to guide implementation Collaborate with key stakeholders to ensure that all elements of the projects are delivered in line with the project plan. Identify and coordinate support from additional expertise and/or resources from within the SIDH

SESLHD District Form F370 Page **2** of **9**

relationships with key stakeholders within and external to SESLHD to ensure priorities are met. • Work collaboratively with the Executive Sponsor, respective Governance Groups and key stakeholders to lead the development of program planning documentation and program delivery that best supports successful outcomes and realisation of benefits, aligned to the SESLHD strategic priorities • Facilitate and coordinate the development and implementation of business and strategic plans, policies, procedures, standards and practices to ensure innovation and improvement is sustainable including accurate implementation and rigorous evaluation methodologies • Track and report on Platform Development project progress, outcomes, risks, milestones and timelines as required by project teams and stakeholders • Identify, assess and manage risks where appropriate providing advice to key stakeholders on change management approaches • Establish escalation processes to support the achievement of successful Platform development project outcomes and instigate risk mitigation or escalation processes where appropriate. • Provide secretariat support for relevant Steering Committee meetings and other ad hoc meetings to support the project objectives
--

Section 3 – Key Challenges

 Raising the profile of the selected platforms to drive business growth and increase 			
the customer base by demonstrating their value proposition and aligning their			
capabilities with SESLHD business requirements and strategic direction.			
 Developing and maintaining effective collaboration, coordination and 			
communication across LHD partners, clients, central agencies and key			
stakeholders.			
 Anticipating projected future financial, personnel and resource challenges and 			
addressing these using appropriate strategies.			
The Platform Product Manager refers to the relevant Governance Steering			
Committee, Business Intelligence Data Solutions Manager, assigned District			
committee and working groups and the platform development teams in decision			
making in key aspects of the initiative, including management of staff and other			
resources to achieve work objectives.			
 Allocating resources to changing needs of customers and stakeholders and working 			
in partnership to ensure client and partner needs are met.			
 Internally, the Platform Product Manager is required to communicate and report 			
regularly with the Business Intelligence Data Solutions Manager, as well as			
stakeholders on performance, business growth, commercialisation and other			
agreed indicators.			

SESLHD District Form F370 Page **3** of **9**

- Externally, the Platform Product Manager will develop and maintain effective relationships with clients, state and central agencies, industry and community stakeholders.
- Provide leadership in supporting platform utilisation and change management using effective communication strategies.

Facility/Service	South Eastern Sydney Local Health District		
Department	Strategy, Innovation and Digital Health		
Manager	Head, Analytics & Reporting		
Position Number	716963		
Cost Centre	181219		

Section 1 - Role Details

Position Descri	ription Title *	Clinical Analytics Manager
Does this role require Multiple Awards?*		NO
	Award* evant Awards	Health Managers (State) Award
	assification*	Health Manager Level 4
Job Category Co		Research & Analytics
Job Classifica	(ROB)*	Data Analytics
Job Speciality C	oding (ROB)	Lead Data Analysts
Executive Level		NO
Does this rol superv	vise others?*	YES
Primary	(Mandatory)	The vision for South Eastern Sydney Local Health District (SESLHD) is 'exceptional care, healthier lives'. SESLHD is committed to enabling out community to be healthy and well, and to providing the best possible compassionate care when people need it.
Purpose of the role* A concise summary of the primary purpose of the role, answering the question: "Why does this role exist?"	(Free text)	Provide strong leadership and senior management to the clinical analytics team within Analytics and Reporting (ART), while overseeing the generation of insights and informatic products to ensure delivery of an integrated and effective service. The Clinical Analytics Manager works with the Head, Analytics and Reporting to create clinical and operational insights to help optimise service delivery and health outcomes for SESLHD and supervises junior analysts. The Clinical Analytics Manager will conduct complex epidemiological and statistical analysis using a variety of data sources, including routinely collected administrative data and linked records and transform the data into quality information for a

variety of audiences.
The Clinical Analytics Manager will undertake population health and operational priority research for projects using a range of datasets including linked and/or geo-coded health data in the development of enhancements to statistical approaches that will better inform state-wide health service planning and development.

Section 2 – Key Accountabilities

Standard Key Accountabilities*	(Free Text)	 Develop novel algorithms and analyses which result in clinical and operational improvements by leading high-quality, advanced biostatistical analysis and providing interpretation for health service and patient outcomes data. Undertake an analysis of linked data, including ad-hoc data collections that have been developed in response to health system innovations to improve health service outcomes. Supervise junior biostatisticians to complete analyses and provide direction based on the project requirements. Collaborate with clinicians and project managers to develop statistical analysis plans that meet clients' research aims or analytic support needs. Provide high-level biostatistical advice to support the evaluation of high priority clinical programs or interventions. Lead research projects aimed at developing new methods and indicators for population health monitoring and surveillance and to assess the validity and reliability of epidemiological and surveillance data. Provide high-level biostatistical advice and undertake analysis to support reporting, data visualisation, performance monitoring and other functions. Provide technical advice and prepare reports and scientific papers for publication, ministerial briefs, and correspondence in relation to other requests for statistical information, responses to parliamentary questions, speech notes and discussion papers. Enhance the technical capability and practice of the team by understanding, applying and providing training in advanced or novel statistical methods. Communicate and collaborate across multidisciplinary stakeholders both internally and externally, to ensure deliverables that are effective and fit for purpose. Uphold the highest standards of professionalism at all times by performing the functions of this role efficiently, economically, fairly, impartially and with integrity and by actively advocating organisational principles and values, to ensure that

Maintain responsibility for personal and professional development by participating in training/education activities and performance
reviews/appraisals in order to continuously improve the level of management.
 All staff are expected to take reasonable care that their actions do not adversely affect the health and safety of others, that they comply
with any reasonable instruction that is given to them and with any
reasonable policies/procedures relating to health or safety in the workplace, as well as notifying any hazards/risks or incidents to their
managers.Recruit, coach, mentor and performance develop staff, to develop
the capabilities of the team to undertake changing roles,
responsibilities and to provide for succession within the unit. • Comply with and implement the NSW Health Work Health and
Safety Better Practice Procedures by identifying, assessing,
eliminating/controlling and monitoring hazards and risks within the workplace, to the extent of delegated authority for the role.
workplace, to the extent of delegated authority for the fole.

Section 3 – Key Challenges

Providing consistently high quality reports and analysis for Local Health
District (LHD) level process optimisation, publications, and responding to ad
hoc requests for statistical information often at short notice against a
background of high work volumes and demands for accurate, expert
responses to complex issues, requiring the integration of diverse sources of
information.
Anticipating and planning for the technical complexities inherent in
epidemiological/biostatistical analyses across highly complex, dynamic and
expanding medical fields with a commensurate growth in demand for
epidemiological/biostatistical data and related information.
Maintaining a strong grasp of current developments in the rapidly changing
fields of biostatistical analysis, data management and biostatistical methods
and software.
The Clinical Analytics Manager has substantial autonomy in the management
of staff and other resources of the clinical analytics team including managing
the performance of team members to achieve work objectives.
Undertakes negotiations around timelines for delivery of services.
Internally, the Clinical Analytics Manager is required to communicate regularly
with ART managers and team members on achieving the objectives tasks of
the ART.
Externally, the Clinical Analytics Manager will develop and maintain effective
relationships project partners and stakeholders within SESLHD, MOH, and
others.
Providing leadership in supporting workforce reform using superior
communication strategies.

Section 4 – Key Relationships

Key Internal	Who?	Director Strategy, Innovation and Digital Health
Relationships	Why?	To set strategy and ensure deliverables and tasks are aligned with it
	Who?	Head, Analytics and Reporting
	Why?	To collaborate on strategy, priorities and ensure deliverables and tasks
		are aligned with these; that typically multidisciplinary tasks are executed
		smoothly.
	Who?	Clinical and Corporate managers within SESLHD
	Why?	To support stakeholder management
Does this role routinely		
interact with external		YES
st	akeholders?	
Key External	Who?	Ministry of Health
Relationships	Why?	To support stakeholder management and collaborative projects
	Who?	Other Primary Health Networks and LHDs
	Why?	To support stakeholder management and collaborative projects
Is this a Public Senior		
Executive Role which		NO
manages relationship at the		140
Minis	sterial level?	

Section 5 – Staffing/Responsible for

Number of direct and indirect reports to position.

Direct Reports	1
Indirect Reports	0

Section 6 - Financial Delegation

As per delegation manual	As per delegation manual
Other \$	

Section 7 – Essential Requirements

Essential Requirements	(Mandatory)	 All staff are required to complete and submit a Pre-employment Health Declaration Form Dependent on position applied for you will need to complete/provide a Working with Children Check (WWCC), National Police Check (NPC) and/or Aged Care Check.
	(Mandatory)	Staff who supervise others: As a leader you are expected to actively support and demonstrate your commitment to the organisation's safety management system; to establish and

SESLHD District Form F370

	maintain a positive health and safety culture; to consult with workers and others when making decisions that may impact upon the health, safety and wellbeing of those in the workplace; acquire and keep up-to-date knowledge of work health and safety matters; ensure that all workers understand their health and safety obligations and are sufficiently trained in health and safety policy and procedures; report any safety incidents, injury, hazards, risks, concerns or unsafe behaviour in the SESLHD IMS+ safety reporting system within 24 hours, and take appropriate actions to eliminate or minimise related risk to as low as reasonably
(Free Text)	 Staff who do not supervise others: You must take all reasonable care for yourself and others and comply with any reasonable instruction, policies, procedures and training relating to work health, safety and wellbeing, including identifying and notifying any safety incidents, injury, hazards, risks, concerns or unsafe behaviour to the manager and reporting these in the SESLHD IMS+ safety reporting system within 24 hours.

Section 8 - Selection Criteria

1	Postgraduate degree in biostatistics or equivalent qualification or relevant work experience or a
	combination of qualification and work experience.
2	Excellent knowledge of health datasets, clinical and population health analytics.
3	Extensive experience in the use of data management and statistical analysis software, including
	proficiency in R, SAS or similar programming languages.
4	High level knowledge of epidemiological and biostatistical concepts and methods, along with
	substantial experience in their application.
5	Proven ability to work independently as well as in a team environment with the ability to provide
	high level advice.
6	Highly developed creativity and problem solving skills, and the ability to apply these skills to
	produce policy relevant information for the health system
7	Demonstrated ability to manage multiple pressing projects concurrently.
8	

Section 9 – Other Requirements (Optional)

	а
Other culture and supporting practices that reflect the organisations	al
Requirements values through demonstrated behaviours and interactions wi	th
patients/clients/employees	

SESLHD District Form F370

(Man	datory)	Staff who supervise others: Recruit, coach, mentor, and performance develop staff, to develop the capabilities of the team to undertake changing roles, responsibilities and to provide for succession within the unit Staff who supervise others: Manage delegated financial responsibilities, through the development and maintenance of appropriate strategies and effective allocation of resources, to ensure optimal health outcomes are managed within budget
(Free	and res	anage delegated financial responsibilities, through the development dimaintenance of appropriate strategies and effective allocation of ources, to ensure optimal health outcomes are managed within alget.

Section 10 – Disqualification Questions

Disqualification questions are questions that relate to mandatory requirements for a position. These are requirements that should prevent a candidate from submitting an application. Desired requirements can be added as pre-screening questions.
